ENERGY FUTURE

Supporting Jordan's green energy transition.

EU-Jordan long-term commitment

Total budget since 2007

€185 million

in EU grants

EU support for Jordan’s energy sector

Pilot projects

to test renewable energy and energy-efficiency solutions

Budget support

to advance Jordan’s green energy priorities

Technical assistance

for sector planning, regulations and standards

Infrastructure support

for renewable energy systems and facilities

Awareness and communication campaigns

to raise awareness of the green energy transition

Enhancing public–private partnerships and involving NGOs and academia.

Key areas of support
Energy priorities

Renewable energy

Energy efficiency

Electricity connectivity

Key investments on the ground

22,000 solar water heaters

1,000 photovoltaic solar systems for households and public facilities

820 solar water pumps

23 Schools supported with PV solar systems in the Jordan Valley and refugee-hosting communities

Major projects across Jordan

2.15 MW photovoltaic solar tracking systems for hospitals

Electricity generation from biogas at two wastewater treatment plants in Jerash and South Amman to improve energy efficiency

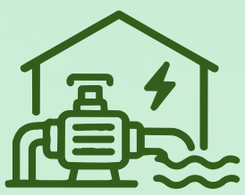
SAHARA Forest Project, a water–energy–food nexus project north of Aqaba

Biogas facility at Al Ghabawi landfill in Amman to generate electricity

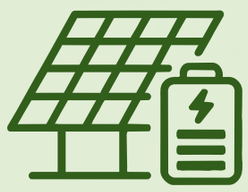
Flagship project

Energy transition and energy security

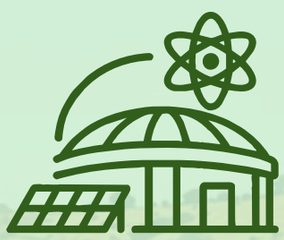
More than 35 MW
of solar and wind renewable energy installations across a group of projects.



5 water-pumping stations
four using electricity wheeling from Disi to support Wadi Arab, Azraq, Zatari and Zai, and one at Zara Ma’een.



25 MW photovoltaic solar systems
supporting the water-pumping stations, alongside
15.5 MW of battery storage at Azraq.



7 MW photovoltaic solar facility
supporting SESAME, the first renewable-energy-powered synchrotron in the region.
