WATER SECURITY

Investing in a resilient, water-secure future.

EU-Jordan long-term commitment

Total budget since 2016

€415 million
in EU grants

+

€2.6 billion
in additional financing

EU grants + **Financial institutions** + **Other development partners**

EU support for Jordan’s water sector

Investment grants
for critical infrastructure and services

Budget support
to strengthen sector governance

Policy dialogue
to support lasting reforms

Loans
to mobilise additional financing

Technical assistance
for capacity building and project implementation

Working closely with the Government of Jordan, European financial institutions and international partners.

Key areas of support

Drinking water supply

Diversification of water resources

Wastewater treatment and reuse

Reduction of water losses

Energy efficiency

Sector reforms

Key investments on the ground

Construction and rehabilitation of water supply and distribution networks

Wastewater treatment plants

Irrigation infrastructure

Renewable energy solutions for water facilities

Major projects across Jordan

Water supply projects in Irbid and Wadi Al Arab

A new wastewater treatment and reuse project in Shallalah

Complementary investments in the Jordan Valley

6 wastewater treatment facilities across Jordan

Flagship project

Aqaba–Amman Water Desalination and Conveyance Project (National Conveyor)

~€2 billion

in European financing: **€1.64 billion** for the National Conveyor + **~€360 million** for the Readiness Programme.

~4 million citizens

expected to benefit from the project, aiming to meet water needs.

300 million m³

of drinking water annually, through seawater desalination in Aqaba.

~438 km

of water conveyance infrastructure, including stations, reservoirs and renewable energy facilities.

A broader impact

Enhanced water security for Jordan

Greater climate resilience

More efficient and sustainable use of resources

Support for communities and farmers
