THE COLLEGE COMPLEX
FACTS AND IMPLEMENTATION
The college complex, the construction and the implementing partner

FACTS ABOUT

The college complex and the implementing partner of the European Union

> The implementing partner is handling all practicalities on behalf of the European Union including architectural development, overseeing the construction process by sub-contracted companies and quality control.

The Afghan National Police Staff College is constructed on land allocated by the Ministry of the Interior, located in Police District 12 of Kabul City.

Construction started in June 2012 and was completed in December 2013. The college was ready to receive students for its first course on 25 January 2014.

The Police Staff College is a key element of the “Civilian Police Capacity Building Program” aiming to increase the training capacity of the Afghan National Police.

Space for 300 students

With a total building area of approximately 10,000 m² the Police Staff College is a multi-function complex with a capacity to train and accommodate 300 Police Officers. The college complex includes: an academy building, dormitories for 300 students in double rooms – including a separate section for 22 female students, children's day care section, kitchen and dining facilities, two auditoriums, 20 classrooms, a library, computer room, administration offices and lecturers/teachers offices, barracks for guard units and parking area.

From the EU, for the Mol, by IOM

The International Organization for Migration (IOM) has been the European Union’s implementing partner for the Police Staff College. The project has been fully funded by the European Union and was implemented by IOM for the Afghan Ministry of Interior (MoI).

IOM has been responsible for the complete implementation of the project including design, pre-construction, construction, and procurement of supplies necessary for furnishing and equipping the facility to the required standard.

IOM developed the design concept based on requirements defined by the EU and the European Union Police Mission to Afghanistan (EUPOL). The design was further developed to create a facility which was both architecturally appealing and at the same time accommodating all requirements of the Afghan Ministry of the Interior. The design also takes into account Safety Code requirements based on internationally recognized Building Codes.

About IOM

IOM’s Emergency & Development Infrastructure Department is designing and constructing quality projects with the purpose of enhancing good governance and promoting community sustainability. IOM has been implementing infrastructure projects since 2002. The projects are providing opportunities for Afghan artisans to obtain additional experience and improve their skills and as such supporting local trade and economy.

A state-of-the-art architectural design gives the buildings a modern dynamic expression.

The dormitories accommodate up to 300 students in modern, comfortable double rooms in two three story buildings.

There are two high-tech auditoria available. The large auditorium seats 250 students, the small 50 students.
