

EU ASSISTANCE TO UKRAINE

June 2025

- The European Union (EU) and our 27 Member States remain united and determined in our unprecedented support for Ukraine. Since the start of the war, the EU and our Member States have made available over **\$162 billion¹** in financial, military, humanitarian, and refugee assistance, of which **65%** have been provided as **grants** or **in-kind** support and **35%** in the form of highly concessional loans.
- In addition, in February 2024, European leaders agreed to commit up to **\$54 billion until 2027** for the **Ukraine Facility** to support Ukraine's recovery, reconstruction and modernisation, as well as its reform efforts as part of its accession path to the EU. Furthermore, in October 2024, the **EU and G7 partners** agreed to collectively provide loans of **\$50 billion** to support Ukraine's budgetary, military and reconstruction needs, financed by extraordinary revenues from immobilised Russian sovereign assets. The EU will contribute up to **\$20 billion**, the first \$6.5 billion of which was disbursed in 2025. This will bring our commitments to **close to \$200 billion**.
- In April 2025, the EU made additional \$2.3 billion available generated from **immobilised Russian assets**, **\$3.9 billion** in total, **\$3.5 billion** for military support via EPF and **\$400 million** through the Ukraine Facility.
- In December 2023, European leaders endorsed opening **accession negotiations** with Ukraine. **Ukraine has shown remarkable determination and progress on reforms**, including anti-corruption, while defending its country and its people against Russia's aggression. Ukraine is already a **member of the European family** and we will continue supporting Ukraine every step of the way on its path to EU membership.
- Since the start of Russia's illegal war, we have worked in lockstep with the United States and other partners to impose **massive sanctions** on Russia, its military, and its economy, as well as to isolate Russia internationally, **in spite of their negative effects on Europe's economy**.
- The EU also moved at **lightning speed to diversify our energy supplies and decouple from Russian fossil fuels**, banning Russian coal and oil imports and drastically reducing gas imports. The U.S. commitment to support Europe in substituting **U.S. LNG** for the majority of imported Russian gas has been instrumental in derailing Putin's plans.

Collective EU and EU Member State support to Ukraine includes:

- **\$85 billion** in **financial and budgetary support** and in **humanitarian and emergency assistance**. This support is as essential as military assistance to ensure Ukraine's success on the battlefield. It allows Ukraine to keep paying wages and pensions and maintain essential public services, such as hospitals, schools, and housing for relocated people. It also ensures macroeconomic stability, and helps restore critical infrastructure destroyed. It includes:
 - ✓ **\$35 billion** of financial assistance to Ukraine in 2022 -2024 and **\$7.6 billion** in 2025
 - ✓ **\$27.9 billion** of financial assistance mobilized from the Ukraine Facility

¹ EUR values converted into USD at the 12-month average ECB reference exchange rate as of 13 June. The total figure includes \$28 billion already mobilized under the Ukraine Facility and \$7.6 billion already disbursed as part of the G7 loan.

- ✓ **\$13.2 billion** of financial assistance directly from EU Member States in grants, loans, and guarantees
 - ✓ **\$3 billion** in loans from the EIB and EBRD guaranteed by the EU budget
 - ✓ **\$4.8 billion** in humanitarian aid, emergency assistance, budget support and crisis response and \$122 million to **rebuild Ukrainian schools**
 - ✓ Over **155,000 tonnes** of in-kind assistance, including medical supplies, mobile hospitals, shelters, school buses, ambulances, and close to **9,000 power generators**, with an estimated value of over **\$1 billion**, have been provided via the **EU Civil Protection Mechanism** by 35 participating countries, coordinated by the EU.
 - ✓ The EU has coordinated **4,000 medical evacuations** of Ukrainian patients to provide them with specialised healthcare in hospitals across Europe.
- Over **\$54 billion** in **military assistance** – ranging from ammunition to air-defence systems, Leopard tanks, and fighter jets. This includes an unprecedented **\$6.6 billion** from the “European Peace Facility,” in addition to bilateral contributions by our Member States. On top of that, in March 2024, the Council established a dedicated [Ukraine Assistance Fund](#) worth **\$5.4 billion**. EU support also includes **\$2.2 billion** for the joint procurement and delivery of up to an additional **one million rounds** of artillery ammunition and an additional **\$535 million** to boost EU defence industry capacities in ammunition production. The EU is today the **largest military training provider to the Ukrainian armed forces** – over **73,000 Ukrainian military personnel** trained under the EU’s **\$390 million** Military Assistance Mission. An additional **\$27 million** have been provided for humanitarian de-mining of liberated territories.
 - Up to **\$18 billion** from the EU budget to support **Ukrainian refugees** who have fled to EU Member States since February 2022. Close to 8 million refugees have been recorded in the EU, mainly women, children, and older persons, and more than **4 million Ukrainians** have registered for temporary protection in the EU, which means they are entitled to work, accommodation, healthcare, as well as schooling for their children.
 - Over **\$2.2 billion** to boost “EU Solidarity Lanes” to transport **Ukrainian food** to the world and address the food security crisis caused by Russia’s war. These lanes have already helped Ukraine export over **183 million tonnes** of goods, including **85 million tonnes** of grains and related products, and generated much-needed revenue for Ukraine’s economy.
 - We have temporarily **suspended EU import duties** for exports from Ukraine and figures show Ukraine’s exports are exceeding pre-war levels.

By bringing war back to Europe, Putin plans not only to destroy Ukraine and destabilize Europe, but tear up international law and the UN Charter and undermine peace and security in the entire world, with dire consequences for vital American and European global security interests.

We are **grateful to the United States for its unwavering bipartisan support to Ukraine**, and for standing with the European Union as we jointly work to ensure Ukraine’s victory in its ongoing fight for survival as an independent country and a sovereign nation. This is **not the moment to weaken our support to Ukraine**. Ukraine can only defeat Putin’s aggression if it **stands firmly on two legs of American and European support**.

Standing together against Putin’s brutality will be even more crucial in the months to come as we continue to address Ukraine’s needs and hold Russia accountable for its criminal actions.
