“Contributing States will take all legal and regulatory measures to ensure the transportation of firearms, firearm parts and ammunition, as well as the declaration of entry of such weapons and ammunition into the territory of the host nation. Contributing States will, in liaison with the contingent commander, make the same arrangements for the transport of such equipment at the end of the deployment of their personnel. Contributing States shall provide their armed Police/Military personnel with sufficient ammunition for their regular training in the use of weapons without prejudice to their national regulations. A minimum is expressed in the list of recommended safety equipment.”
