

## EUROPEAN UNION (EU) ASSISTANCE TO UKRAINE

June 2026

- **The EU is Ukraine's largest supporter.** Since the start of the war, the EU and our Member States have made available over **\$226 billion**<sup>1</sup> in financial, military, humanitarian, and refugee assistance (**65% in grants or in-kind support and 35% in highly concessional loans**). **We remain united and determined in our support for Ukraine.**
- On 23 April 2026, European leaders agreed an additional loan of **\$104 billion** to meet Ukraine's needs in 2026-2027. Nearly \$70 billion is for military assistance with over \$34 billion for budgetary support.
- In February 2024, European leaders agreed to commit up to **\$54 billion until 2027** for the **Ukraine Facility** to support Ukraine's recovery, reconstruction and modernization, as well as its reform efforts as part of its EU accession path.
- In October 2024, the **EU and G7 partners** collectively provided loans of **\$50 billion** to support Ukraine's budgetary, military and reconstruction needs, financed by extraordinary revenues from immobilized Russian sovereign assets. The EU will contribute up to **\$20 billion**, the first \$10 billion was disbursed in 2025. In April 2025, **\$2.3 billion** generated from the proceeds of the **immobilized Russian assets**, **\$4.04 billion** in total, **\$3.5 billion** for military support via EPF and **\$400 million** through the Ukraine Facility were provided.
- On 15 June 2026, Ukraine **opened EU accession negotiations** with Ukraine. This future of Ukraine and its citizens is firmly anchored in the EU. It also underscores **Ukraine's steadfast commitment to European integration** and recognises the substantial **progress achieved by Ukraine** in the face of unprecedented challenges of Russia's war against it. We will continue supporting Ukraine every step of the way on its path to EU membership.
- Since the start of Russia's illegal war, we have worked in lockstep with the United States and other partners to impose **massive, unprecedented sanctions** on Russia despite their negative effects on Europe's economy, as well as to isolate Russia internationally.
- The EU has **diversified energy supplies and decoupled from Russian fossil fuels**, banning Russian coal and oil and drastically reducing gas imports. The U.S. commitment to substitute **U.S. LNG** replacing most imported Russian gas has been instrumental.

### Collective EU and Member State support to Ukraine includes:

- **Over \$122 billion in financial and budgetary support and in humanitarian and emergency assistance.** This allows Ukraine to keep paying wages, pensions and maintain essential public services, like hospitals, schools, and housing for dislocated people. It ensures macroeconomic stability and restoring destroyed critical infrastructure. It includes:
  - ✓ **\$50 billion** of financial assistance in 2022 - 2025
  - ✓ **\$34 billion** of financial assistance mobilized from the Ukraine Facility
  - ✓ **\$16 billion** of financial assistance directly from EU Member States in grants, loans, and guarantees
  - ✓ **\$3 billion** in loans from the EIB and EBRD guaranteed by the EU budget
  - ✓ **\$4.8 billion** in humanitarian aid, emergency assistance, budget support and crisis response, including \$122 million to **rebuild Ukrainian schools**
  - ✓ Over **157,000 tonnes** of in-kind assistance, including medical supplies, mobile hospitals, shelters, ambulances and **power generators**, with an estimated value of over **\$1 billion**, have been provided by 35 participating countries, coordinated by the EU.
  - ✓ **5,136 EU-coordinated medical evacuations** of Ukrainian patients to hospitals across Europe.

<sup>1</sup> EUR values converted into USD at the 12-month average ECB reference exchange rate as of 12 November 2025. The total figure includes \$34.4 billion already mobilized under the Ukraine Facility and \$10 billion already disbursed as part of the G7 loan.

- **ENERGY SUPPORT:** Since 2022, the EU has donated **\$3.4 billion** for **energy security**, primarily via the Ukraine Energy Support Fund and the Union Civil Protection Mechanism (UCPM) and signed a guarantee for **\$577 million** for **gas reserves**. An additional **\$46 million** was provided for **winter preparedness 2025/2026**, and a **Combined Heat and Power Plant** was sent to Ukraine. Nearly 11 600 power generators have been donated by the European Commission and EU Member States/UCPM Participating States, restoring power to hospitals, shelters and critical services.
- Over **\$86 billion** in **military assistance** – ranging from ammunition to air-defence systems, Leopard tanks, and fighter jets. This includes an unprecedented **\$6.6 billion** from the “European Peace Facility,” in addition to bilateral contributions by Member States. On top of that, in March 2024, the Council established a dedicated [Ukraine Assistance Fund](#) worth **\$5.4 billion**. The EU and its Member States have provided **\$82.9 billion** in **military support** to Ukraine since 2022. As part of this support, the High Representative worked with Member States to provide **two million rounds of large-calibre ammunition**. In addition, the EU has mobilized **\$4.04 billion** from the proceeds of **Russian immobilized assets: \$2.2 billion** for the joint procurement and delivery of up to an additional **one million rounds** of artillery ammunition and an additional **\$535 million** to boost EU defence industry capacities in ammunition production. On top of that, in March 2024, the Council established a dedicated [Ukraine Assistance Fund](#) worth **\$5.4 billion**. The EU is now the **largest military training provider to the Ukrainian armed forces** – over **93,000 Ukrainian soldiers** in 2,013 training modules, trained under the EU’s **\$390 million** Military Assistance Mission. An additional **\$80 million** have been provided for humanitarian de-mining of liberated territories.
- **HUMANITARIAN SUPPORT:** Up to **\$18 billion** from the EU budget to support **Ukrainian refugees** who have fled to the EU since February 2022. Close to 8 million refugees have been recorded in the EU, mainly women, children, and older persons. More than **4 million Ukrainians** have registered for temporary protection in the EU, entitling them to work, accommodation, healthcare, and schooling for children<sup>2</sup>.
- **FOOD SECURITY:** Over **\$2.2 billion** to boost “**EU Solidarity Lanes**” to transport **Ukrainian food** to the world and address the food security crisis caused by Russia’s war. These lanes have already helped Ukraine export over **220 million** tonnes of goods, including **93 million tonnes** of grains and related products, and generated much-needed revenue for Ukraine’s economy.

In bringing war back to Europe, Putin plans not only to destroy Ukraine and destabilize Europe, but to tear up international law and the UN Charter and undermine peace and security in the entire world, with dire consequences for vital American and European global security interests.

We are **grateful to the United States for its unwavering bipartisan support to Ukraine**, and for standing with the European Union as we jointly work to ensure Ukraine’s victory in its ongoing fight for survival as an independent country and a sovereign nation. This is **not the moment to weaken our support to Ukraine**. Ukraine can only defeat Putin’s aggression if it **stands firmly on two legs of American and European support**.

**Standing together against Putin’s brutality will be even more crucial in the months to come as we continue to address Ukraine’s needs and hold Russia accountable for its criminal actions.**

---

<sup>2</sup> The Kiel Institute estimates national expenditure by EU member states in support of Ukrainian refugees at approximately \$170 billion.
