# A Summary of EUDR Engagement Activities in Indonesia

September 2023-December 2025

# Study on EUDR Legality Requirements

*in the Context of Indonesia*

Focusing on **cocoa, coffee, rubber, and timber**, this study maps relevantnational and sub-national across ten EUDR indicators.

It highlights **regulatory strengths and gaps**, especially in land tenure and customary land recognition.

# Series of FGDs and Workshops

*on EUDR Readiness in Indonesia*

These series of activities focused on **increasing stakeholders' understanding on EUDR** and what it takes to fulfill its requirements by brining stakeholders together in one forum, **fostering dialogue and collaboration**.

# SEDARI

*Siap EUDR untuk Indonesia*

The series of outreach events established a **common understanding on EUDR main requirements** among sub-national stakeholders in eight districts of five provinces in Indonesia on various EUDR-related topics.

This event provided space for **direct exchange on EUDR** for Indonesian sub-national stakeholders with the EU.

# Communication Products

*on Stakeholders' Experience in Preparing for EUDR in Indonesia*

The series of videos and social media posts aimed to highlight the **stories of value chain actors** involved in commodities affected by the EUDR by showcasing **real examples of successful and ongoing best practices**.

The products focus on their efforts to comply with key aspects of the regulation (i.e. **sustainable production, non-deforestation, traceability, and land legality**).

# Practical Guide

*on EUDR Preparatory Measures for Indonesia Private Sector*

The practical guide is designed to **support Indonesian private sector** actors by clearly outlining the key EUDR requirements.

This practical guide provides step-by-step guidance to help companies **prepare for its implementation and meeting their buyers' requests** while promoting deforestation-free and legally compliant commodity production.

# Practical Guide

*on EUDR Readiness for Indonesia Private Sectors*

This is here to help Indonesia's **smallholder farmers producing relevant crops** understand and get ready for the EUDR.

By working through this guide, smallholder farmers will learn exactly what the EUDR requires, how to prepare, and where to find support. The aim is simple: to **help smallholder farmers succeed in a market that values legality, sustainability, and traceability**.
