

Savannah Integrated Biodiversity Conservation Initiative (SIBCI)

Partnership for
Sustainable
Development

June 2022

In partnership with the European Union

"Participatory integrated management of natural resources in Mole National Park".

Key Information

SECTOR: SUSTAINABLE DEVELOPMENT

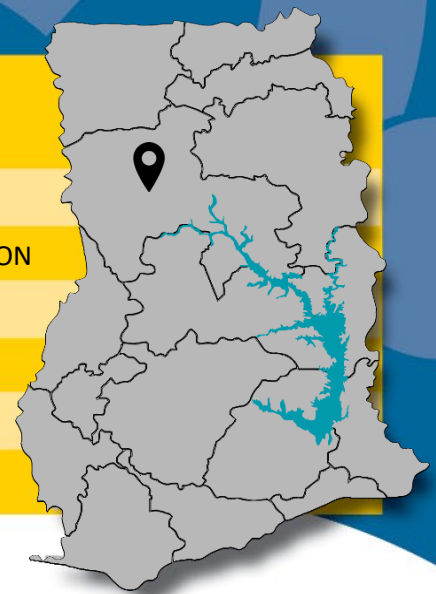

LEAD PARTNER: COSPE onlus; GHANA WILDLIFE SOCIETY; FORESTRY COMMISSION

OTHER PARTNERS: UNIVERSITY FOR DEVELOPMENT STUDIES; NDF

DURATION: 2020 – 2023

TOTAL BUDGET EUR: 1,551,745.80

EU CONTRIBUTION EUR: 1,150,000.00

Background

The Project was initiated by the Ghana Wildlife Society behind the philosophy that conservation of landscapes must be balanced with the needs of resource dependent communities, hence the wellbeing and participation and adequate representation of the communities within the decision-making structures has been considered as key in the project design.

The Project engenders harmony between green economic activities towards improving the livelihoods of the peripheral communities, and conservation of biodiversity within the Mole National Park (MNP).

Project Details

The project's long-term goal is to contribute to the achievement of endogenous, sustainable and inclusive economic development that responds to the challenges of climate change. In the medium-term, the objective is to improve sustainable, participatory and integrated management of the Mole National Park (MNP) towards biodiversity conservation and resilience to climate change.

Expected Results

By the end of the project, the expected results are:

- Socio-economic and sectorial activities relating to the Mole National Park are well coordinated and integrated.):
- Protected Area Management systems are developed and operationalized:
- Resource dependent communities participates and derive benefits from the integrated management of natural resources.
