

EU ASSISTANCE TO UKRAINE

April 2024

- The European Union (EU) and our 27 Member States remain united and determined in our unprecedented support for Ukraine. Since the start of the war, the EU and our Member States have made available over **\$106 billion¹** in financial, military, humanitarian, and refugee assistance.
- In addition, on 1 February 2024, European leaders agreed to commit up to **\$54 billion** for a new **Ukraine Facility** to support Ukraine's recovery, reconstruction and modernisation, as well as its reform efforts as part of its accession path to the EU, **until 2027**. This brings our commitments to date to **over \$155 billion**. Bridge financing of **\$5 billion** was disbursed to Ukraine from the Ukraine Facility on 20 March.
- In December 2023, European leaders also endorsed opening **accession negotiations** with Ukraine. **Ukraine has shown remarkable determination and progress on reforms**, including anti-corruption, while defending its country and its people against Russia's aggression. Ukraine is already a **member of the European family** and we will continue supporting Ukraine every step of the way on its path to EU membership.
- Since the start of Russia's illegal war, we have worked in lockstep with the United States and other partners to impose **massive sanctions** on Russia, its military, and its economy, as well as to isolate Russia internationally, in spite of their negative effects on Europe's economy.
- The EU also moved at lightning speed to diversify our energy supplies and decouple from Russian fossil fuels, banning Russian coal and oil imports and drastically reducing gas imports. The U.S. commitment to support Europe in substituting **U.S. LNG** for the majority of imported Russian gas has been instrumental in derailing Putin's plans.

Collective EU and EU Member State support to Ukraine includes:

- Over **\$51 billion** in financial and budgetary support and in humanitarian and emergency assistance. This support is as essential as military assistance to ensure Ukraine's success on the battlefield. It allows Ukraine to keep paying wages and pensions and maintain essential public services, such as hospitals, schools, and housing for relocated people. It also ensures macroeconomic stability, and helps restore critical infrastructure destroyed. It includes:
 - ✓ **\$27.3 billion** of financial assistance to Ukraine in 2022 and 2023
 - ✓ **\$5 billion** of bridge financing from the Ukraine Facility disbursed in March 2024
 - ✓ **\$13.2 billion** of financial assistance directly from EU Member States in grants, loans, and guarantees
 - ✓ **\$2.8 billion** in loans from the EIB and EBRD guaranteed by the EU budget
 - ✓ **\$3.3 billion** in humanitarian aid, emergency assistance, budget support and crisis response and \$122 million to **rebuild Ukrainian schools**
 - ✓ Over **145,000 tonnes** of in-kind assistance, including medical supplies, mobile hospitals, shelters, vehicles, school buses, ambulances, firefighting equipment, PPE, and close to **6000 power generators**, have been provided via the **EU Civil Protection Mechanism** by 35 participating countries, coordinated by the EU

¹ EUR values converted into USD at the 12-month average ECB reference exchange rate as of 18 April.

- ✓ The EU has coordinated over **3,120 medical evacuations** of Ukrainian patients to provide them with specialised healthcare in hospitals across Europe
- Close to **\$36 billion** in **military assistance**, and increasing – ranging from ammunition to air-defence systems, Leopard tanks, and fighter jets. This includes an unprecedented **\$11.5 billion** from the “European Peace Facility,” in addition to **\$25 billion** in bilateral contributions by our Member States. On **ammunition for Ukraine**, EU support includes **\$2.2 billion** for the joint procurement and delivery of up to an additional one million rounds of artillery ammunition by early 2024, and an additional **\$535 million** to urgently boost EU defence industry capacities in ammunition production. The EU is today the **largest military training provider to the Ukrainian armed forces** – by the end of 2024, **60,000 Ukrainian military personnel** will be trained under the EU’s **\$390 million** Military Assistance Mission. An additional **\$27 million** has been provided to support Ukraine’s de-mining of liberated territories temporarily occupied by Russian armed forces.
- Up to **\$18 billion** from the EU budget to support **Ukrainian refugees** who have fled to EU Member States since February 2022. Close to 8 million refugees have been recorded in the EU, mainly women, children, and older persons, and more than **4 million Ukrainians** have registered for temporary protection in the EU, which means they are entitled to work, accommodation, healthcare, as well as schooling for their children. Today, close to **20 percent of Ukraine’s children are taking refuge in the EU**.
- Over **\$1 billion** to boost “**EU Solidarity Lanes**” to transport **Ukrainian food** to the world and address the food security crisis caused by Russia’s war. These lanes have already helped Ukraine export over **60 million tonnes** of grains and other related food products, and generated much-needed revenue for Ukraine’s economy. As part of the *Grain from Ukraine* initiative, the European Commission will finance the transport of **40,000 tonnes** of Ukrainian grain to vulnerable countries.
- We have temporarily **suspended EU import duties** for exports from Ukraine. The latest figures show Ukraine’s exports are exceeding pre-war levels, again with massive beneficial consequences for Ukraine’s wartime economy.

By bringing war back to Europe, Putin plans not only to destroy Ukraine and destabilize Europe, but tear up international law and the UN Charter and undermine peace and security in the entire world, with dire consequences for vital American and European global security interests.

We are **grateful to the United States for its unwavering bipartisan support to Ukraine**, and for standing with the European Union as we jointly work to ensure Ukraine’s victory in its ongoing fight for survival as an independent country and a sovereign nation.

This is **not the moment to weaken our support to Ukraine**. Ukraine can only defeat Putin’s aggression if it **stands firmly on two legs of American and European support**.

Standing together against Putin’s brutality will be even more crucial in the months to come as we continue to address Ukraine’s needs and hold Russia accountable for its criminal actions.
