

Kara Suu water project

Implementing organisation(s)	<i>European Bank for Reconstruction and Development</i>
Location	<i>Kyrgyzstan, Kara - Suu region</i>
Keywords	<i>Water infrastructure, sustainability, Kyrgyzstan</i>

Program Development Objective

The Kara-Suu water project aims at improving the availability, reliability and quality of municipal infrastructure in Kara-Suu region. Also, it focuses on the commercialization of water supply and sanitation in order to ensure operational and financial sustainability once the project is completed.

A total of 5, 3 million euros were invested to address the infrastructure and rehabilitation needs in the water sector in Kara – Suu region

Beneficiaries

10,600 people are currently serviced by the water companies; their number is predicted to increase to 13,500 after the project implementation.

Project's activities:

- Investing in the water supply infrastructure, that was not renewed since the Soviet era
- Improving wastewater management
- Metering operation
- Maintenance equipment

- Supporting the institutional reform of Kara- Suu Water Company including

Location

Expected outcomes

- The number of people with access to affordable, drinking tap water will increase from 10,600 to 13,500;
- Implementation of an individual metering system for each household and of a metering based billing;
- Reduction of water production
- International Financial Reporting Standards (IFRS) and Environmental and Social Action Plan (ESAP) are implemented.
